

TREATMENT AFTERCARE

FILLERS LIPS (HYALURON)

COMMON SIDE EFFECTS

- Some redness around injection sites
- Bruising after injections is possible
- Treated areas may appear to be uneven due to swelling

Please allow two weeks for treated areas to settle properly. If you are concerned that something is wrong you're more than welcome to contact us but your final results cant be accessed for two weeks after your treatment.

AFTER YOUR TREATMENT

- Keep the area clean, avoid makeup for at least 24 hrs
- You can use vaseline on your lips from a new container
- A cold compress will help reduce swelling
- Antihistamines will also help with initial swelling
- Avoid exercise, sauna, sunbeds for at least 24 hrs
- After a couple of days lips can be massaged gently

Dermal fillers can last longer in some people than others. Lifestyle, metabolism etc. has an effect so results can vary. Please be aware that more than one session is often required to achieve the desired look. The first touch up treatment is recommended to be made within 4 to 5 weeks after.
